

MATRIX

LEADING INNOVATION

**Secured key control
system**

Who's guarding your safes and safe deposit box's keys?

Do you have control over who can take each key?

Do you have records of every use of a key?

MATRIX are a premium key management systems which allows full control of your keys and assets.

With our systems, controlling your keys has never been easier - you will be able to decide who has access to each key and receive real-time data regarding who took what, when and for which purpose.

But when it comes to key cabinets, controlling your keys is important but protecting them is crucial.

MATRIX provides the highest level of security to your assets as each key is secured in a sealed compartment and every transaction is captured by a dedicated video camera.

With MATRIX your clients can secure their safe deposit key while controlling who could access it (using biometric identification) and even receive real time alerts when their key has been check out.

**Forget everything you thought you know about
key cabinets and discover the MATRIX**

Simple

1 Identify
Biometric / RFID Tag Pin code

2 Select a key
According to personal authorizations

3 Receive access
To the requested key only

Secured

The MATRIX is a heavy duty cabinet made from steel with locked drawers. Unlike other systems, where anyone who opens the front door can steal or duplicate any key in the cabinet, MATRIX protects each key in a separate locked compartment with no ability to access without manager permissions

Video Records

For an even higher level of security, a dedicated camera can be added to capture every transaction. Using cross-cutting reports, now you can also have visual of every activity made.

A man in a white shirt and blue tie is sitting at a desk, looking at a computer monitor. The word "Control" is written in white text in the top right corner of the image.

Control

The MATRIX has a power software with many unique features that provide you better control along with the security level you need.

- **Limit system access to working hours only**
- **Send alert to the key owner when their key has been checked out**
- **Require users to report check out reason**
- **Determine due date of each item**
- **Send alerts when item wasn't returned on time (user + manager)**
- **Document every transaction by video camera**
- **Send alerts when a drawer was forced open and start the camera**
- **Control from a remote location (optional - The system can work offline)**

Efficient

WE GIVE YOU MORE

In the same system that you manage keys, you can secure and manage every valuable object. From credit cards, documents and even cash deposit - **everything is possible.**
